

NFR007 - Maximum system response time

Purpose	The OCI Conformance Program requires Digital Wallet Providers to report data on average and maximum system response time as described in NFR007 in the Digital Wallet Conformance Criteria.
OCI Benchmark	Average total time for VP generation and verification API calls = 1500 ms Maximum total time for VP generation and verification API calls = 3000 ms
References	OCI Digital Wallet Conformance Criteria OCI Conformance Program

Performance Data

Reporting Month	Maximum system response time	Average system response time
09 2024	571.04 ms	239.23 ms
10 2024	730.06 ms	313.69 ms
11 2024	989.01 ms	540.86 ms

The reported maximum system response time is the sum of both generation and verification API calls and represents the 95% confidence level based on a 50% sampling rate.

The reported average system response time is the sum of both generation and verification API calls based on a 50% sampling rate.
